	Opportunities for Growth	Opportunity #1	Calculated by evaluating the largest gap between county performance and peer counties. If a county did not have 3 gaps vs. peer counties, it was then compared to the state average and then the goal (for indicators with goals) to ensure that all counties have 3 opportunity areas. Note: AP Participation was not considered as an opportunity area for counties with fewer than 20 students enrolled, due to potential resource barriers to implementation. AP and CCP jointly form the OFG titled "Earning College Credit in High School". This only counts as one of the top OFG if AP or CCP is in the top 3, and the other is still out performed by peer counties.
